

IMPROVE OUTCOMES & PROFITABILITY USING BRIGGS OASIS SYSTEMS

An independent study shows Briggs OASIS forms improve performance and patient outcomes.¹

Briggs OASIS documentation solutions include the most up-to-date regulatory parameters and assessment requirements, which remove second-guessing and increase accuracy. Agencies using Briggs OASIS forms report:

- **Better outcomes for ALL CMS measurements:**

 - 4.8% above** the national rate in improved dyspnea
 - 6.0% above** the national rate for pain improvement
 - 12.5% above** the national rate in improved ambulation/locomotion
- **Lower occurrence rates:**

 - 14.7% below** the national rate in reduction of emergent care
 - 20.5% below** the national rate in reduction of emergent care, wound infections/deterioration rate
- **Reduced resource utilization:**

 - 47.2% below** the national rate in home aid visits
- **Reduced costs per visit:**

Compare the national average cost per visit using other forms to Briggs OASIS forms:

Common Services	Competitors	vs.	Briggs	SAVINGS
Home Health Aide	\$63.75		\$33.66	47%
Skilled Nursing	\$141.93		\$130.58	8%
Medical Social Work (MSW)	\$201.69		\$180.31	11%

These benefits directly translate into improved quality of care. And since medical payments are per episode—not per visit—fewer patient visits means greater profit for your agency.

1. The Briggs Documentation Solutions Outcome Study was conducted by OCS, Inc., the nation's leading post-acute health care information company.

User-friendly forms make reporting easier -

The outcomes reported in the study indicate that the user-friendly layout and features of Briggs OASIS forms improves reporting accuracy. Features include:

- **485 locators** that provide faster and easier completion of the 485 Plan of Treatment
- **Home safety evaluations** which measure fall risk
- **Expanded pain assessments** to allow for more effective pain management
- **Check boxes** to ensure all paperwork is completed

Briggs removes second-guessing -

Briggs enhances your performance outcomes by including the most up-to-date regulatory parameters and assessment requirements in our OASIS forms. Whenever CMS regulations change, we're ready with new form revisions, so you're always collecting the right data to support better patient outcomes and accurate payments.

We support our OASIS Documentation Solutions with a variety of tools that keep your staff knowledgeable about current regulations. And our customer service representatives are here to answer your questions or direct you to the appropriate clinical consultant for a response.

Your agency can feel confident about choosing Briggs **OASIS Documentation Solutions**. Achieve favorable outcomes and strong performances while reducing your bottom line costs.
